

STAMPED CONCRETE
EXCAVATING & HARDSCAPES

Thank you for considering us for your project!

We are a family-run business based in Sparta, NJ, specializing in concrete stamping and flatwork, as well as excavating services.

Concrete flatwork has long been a staple in modern home design, offering durability and versatility for various projects. Concrete Stamping is a decorative technique, which is done during the finishing stages.

Explore this brochure for a curated selection of concrete stamping designs and color finishes.

			*Caution: 908 Carbon Black can negate the amount of entrained air in the concrete mix. See back for more information.		
600 Fog 1 - 25 lb.bagger2 yds. (2% white in gray cement)	600 Ceramic 1 - 25lb.bagger1yds. (4% white in gray cement)		These color chips represent shades of integral colors based on medium tone gray Type I, II, IL Portland cement with 4" slump. Use this chart as a guideline only. The colors may not exactly represent the final color. Shade variations of cement and aggregate, plus variations in the mix design, volume of water, addition of admixtures and other additives, finishing and sealer will have an effect on the final color. The colors shown on this color chart represent unsealed colored concrete. Use of a concrete sealer may darken the color. Therefore, we recommend that a test slab be poured and approved prior to the start of the job.
